## Harvel® CPVC Pipe and Duct Specified for Demanding Applications

Harvel Plastics is now manufacturing CPVC corrosion resistant schedule 40 and 80 pressure pipe through 18", for use at temperatures up to and including 200°F. Pressure rating (130psi to 1130 psi) varies with schedule, pipe size, and tem-

perature as stated in Harvel Plastics, Inc. engineering bulletin (Product Bulletin 112/401).

Harvel CPVC Duct is manufactured in sizes 6" - 24" for corrosive ventilation applications. Fabricated fittings for pressure and duct applications are available from Harrison Machine & Plastic Corporation.

Harvel CPVC is generally resistant to most acids, bases, salts, aliphatic solutions, oxidants, and halogens. Chemical resistance data is available and

should be referenced for proper material selection. Pipe exhibits excellent flammability characteristics (ULC Listed for Surface Burning Characteristics) and other physical properties.

Typical applications include: chemical processing, plating, high purity applications, hot and cold potable water systems, water/wastewater treatment, and other industrial applications involving hot corrosive fluid transfer. Visit their website at [www.harvel.com](http://www.harvel.com).

### Industry Events

- IAPD 50th Annual Convention September 13-17, Vancouver, BC, Canada

### Notes of Interest

- You've just got one problem. You stand too close to the ball after you've hit it. — **Sam Snead**
- You were running a good race. Who cut in on you and kept you from obeying the truth — **Galatians 5:7**

### Company News

- Foust Marketing is now stocking the new **North Sea Resins** rapid repair resins for plastics, metals, fiberglass, and more. Contact us for more information.

## IPS Corporation Leads Industry in Underground Test Products

For more than four decades IPS Corporation has been the industry leader in development and application of WELD-ON solvent cements for the joining plastic and dissimilar materials.

WATER-TITE is also the industry leader in plumbing and roofing products for use in new construction, service and repair.

In addition to these fine products WATER-TITE is the manu-

facturer of the TEST-TITE® brand of pneumatic and mechanical pipe plugs for plumbing, sewer testing and maintenance.

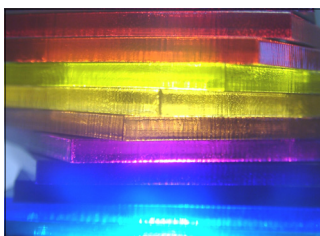

TEST-TITE® is a manufacturer of pipe plugs, bypass plugs, air test plugs and accessories used for testing, plugging and bypassing plumbing and sewer lines.

Contact us to get your copy of

the TEST-TITE® catalog, or browse their website at [www.ipscorp.com](http://www.ipscorp.com) for more information on the TEST-TITE® brand of fine products.

## Bunker Plastics Offering Quality Transparent Acrylic Colors

Bunker Plastics has been producing quality mirror and coated plastics for more than 20 years. What you may not have known is that Bunker maintains one of the largest inventories of transparent colors (not mirror) available for sale to its customers. They stock the acrylic colors for customers that need colored mirror, but will sell the raw substrate to its customers with a **one sheet minimum** for any color they stock, or you can add to your regular mirror purchases and get freight paid with a 30 sheet order. Acrylic sheet manufacturers may require a minimum color sheet order. For example, if you wanted one sheet of Purple 1020, the manufacturer may require a 10 sheet minimum order. That may not be the best for your inventory if you only sell one sheet of Purple a year. Please contact us and let Bunker help you with your colored acrylics on your next order.

## King CuttingBoard® Family of Products

The King CuttingBoard® family of products is a comprehensive set of NSF approved polymer sheets for restaurant kitchens, supermarkets, butcher shops and food-processing facilities.

King CuttingBoard® products will not dull knives like wood. It is made to last in the most demanding commercial environments. It is easy to clean, easy to maintain, and can not rot or splinter. All Products comply with FDA and NSF guidelines for a sanitary work surface.

- **King CuttingBoard®** is an exceptionally white natural polyethylene color, creating the bright, clean, sanitary look that commercial food processing operations require.
- **King CuttingBoard® XL** sheets are approximately one-third lighter in weight than standard King CuttingBoard®, allowing for easy handling and cleanup.
- **King CuttingColors®** is a NSF-certified family of color-coded cutting board sheets in five different industry-standard colors to help combat cross contamination. **Blue** for Seafood, **Yellow** for Raw Poultry, **Green** for Vegetables, **Tan** for Cooked Meat, and **Red** for Red Meat. Also available in King CuttingColors® XL.

Visit [www.kingplastic.com](http://www.kingplastic.com) for more information on their complete line of products.

## The Blue Line – Win Harvel Golf Shirt

Foust Marketing is offering the opportunity to win a prize in this issue of **The Blue Line**.

The winner will be randomly selected from entries with correct answers to the product questions based on information provided within the newsletter.

This issue we are offering a **Harvel Golf Shirt**. Enter the drawing by visiting our website with the correct answers to the following questions:

1. Through what size is Harvel CPVC schedule 40 and 80 pipe now available?
2. What sizes is Harvel CPVC Duct available? What company manufactures the fabricated fittings?
3. Name three products manufactured by TEST-TITE®. What are

they used for?

4. Are standard transparent colors available from Bunker? What is the minimum sheet order?
5. Is King CuttingBoard® FDA and NSF compliant? Why do they offer color-coded cutting board sheets?

Complete the entry form at [www.foustmarketing.com/entryform.htm](http://www.foustmarketing.com/entryform.htm).
